

JITHIN MANILAL

Full Stack Python Developer

jithinmanilal@gmail.com | +91 7025947090

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Summary:

Results-driven professional with excellent communication, problem-solving and leadership skills. Transitioning to a career in full stack web development for contributing to innovative projects. Proficient in Python, Django and React.js. Extensive experience in administration, account management and customer service.

Projects:

NextNode a Social Media website:

[GitHub](#) | [Live](#)

- A social media website like Instagram where users can post images. They can like and comment on other posts including following other users to keep up with them.
- A full stack social media website using **React.js** for frontend completed incorporating **Redux-Toolkit** for state management and **Axios** for API queries. For the UI **Tailwind CSS** was assimilated for a dynamic and responsive design.
- Used **Django Rest Framework** for backend while integrating **JSON Web Tokens** for authentication. With complete modules for chat, post, comments, likes and follow. Utilised **Websockets** for chat and notifications.

Cakesmiths an E-commerce website:

[GitHub](#) | [Live](#)

- E-commerce project with cakes as a product. Incorporated product variations with categories.
- Features include cart, wishlist, coupons and orders for the user side.
- On the admin side there are products, customers, orders and coupons management for ease of use.
- Project is made using **Django**, **Postgresql** database and **Bootstrap CSS** for frontend. Integrated **Razorpay** and **Twilio**.

Mini Projects:

Task Management Application:

[GitHub](#)

- Created a task management web application using **Django**, allowing users to create, assign and track tasks.

Password Generator:

[GitHub](#)

- Made a dynamic password generator web application using **Django**, allowing users to create, save and track passwords.

OLX Clone:

[GitHub](#)

- Designed an olx clone using **React.js** and **Firebase**.
